ACTIVITY SERIES LAB - Auburn School District

The Activity Series. Single-replacement reactions only occur when the element that is doing the replacing is more reactive than the element that is being replaced. Therefore, it is useful to have a list of elements in order of their relative reactivities. The activity series is a list of

AP Chemistry Lab 3 1 Activity Series of Metals and Nonmetals
PURPOSE To determine an activity series for metals and an activity series for nonmetals.

INTRODUCTION In this experiment you will study some metals and some nonmetals to find their relative reactivity. A ranking according to reactivity is called an activity series.
