Access Points From high-performance 802.11n Wi-Fi to outdoor mesh to wired-only devices, Aruba access points serve as on-ramps that aggregate user traffic onto the enterprise network. Working in conjunction with Aruba controllers, access points are “thin” devices that need no configuration, no software updates, and no management. In addition to providing network access, wireless access [...]

Belair Access Point Manual

Universal Access Method Universal Access Method The Universal Access Method (UAM) is key element of BelAir’s Policy Enforcement Point (PEP) module. UAM is a simple authentication method where a user needs only a Web browser.
