Category:Birds of the Horn of Africa - Wikipedia
The hornbills are a family of bird found in tropical and subtropical Africa, Asia and Melanesia. They are characterized by a long, down-curved bill which is frequently brightly colored and sometimes has a casque on the upper mandible. Both the common English and the scientific name of the family refer to the shape of the bill, "buceros" being "cow horn" in Greek. Hornbills have a two-lobed kidney. They are the only birds in which the first and second neck vertebrae are fused together; this proba

The people in it weren't good enough at their character, only Richard Chamberlain was in it, and the storyline just didn't do anything for the original. If you haven't seen The Thorn Birds yet, just see Thorn Birds, and do not see the sequel unless you just want to see it to see how disappointing it is compared to the original.
