Welcome to Cardiovascular Pharmacology Concepts Richard E. Klabunde, Ph.D. This site describes drugs that are used in the treatment of cardiovascular disease. The content emphasizes the biophysical, biochemical, and cellular basis for drug therapy.

~~Pharmacology & Therapeutics - Journal - Elsevier~~

The following tutorials have been developed as an aid to learning cardiovascular drugs. The two different tutorial streams approach learning about cardiovascular drugs using either Therapeutic Drug Class or Clinical Disorder as the reference point for learning, the latter of which is more inclusive by addressing related physiologic and pathophysiologic topics as well as pharmacology.

Cardiovascular Pharmacology: Open Access Journal has the increasing role in diagnosis, characterization, therapy of various marked diseases in the field of Cardiovascular Pharmacology. The journal aims to promote international dialogue and collaboration on health issues to improve clinical practice and to expand and deepen the understanding of ...

~~CV Pharmacology - Official Site~~

Treatment of cardiovascular (CV) disease often requires the administration of numerous medications for long periods of time to patients likely to be old and suffering from a range of comorbid conditions. Rational prescribing informed by clinical pharmacology is essential if the right drug is to be administered to the right patient, at the right time, and for the right price.

CARDIOVASCULAR PHARMACOLOGY 119 administration. During intravenous therapy with NTG, if blood pressure (BP) drops and ischemia is not relieved, the addition of phenylephrine will allow coronary perfusion pressure (CPP) to be maintained while allowing higher doses of NTG to be used for ischemia relief.
