~~Guidelines to the writing of case studies~~  
Study design. There are four basic clinical studies: case series, case-control studies, cohort studies, and randomized clinical trials.<sup>2</sup> The case report or case series is probably the weakest method of deriving clinical data. Case series are usually retrospective reviews that list the clinical findings of patients with a specific disease.

Case studies are in-depth investigations of a single person, group, event or community. Typically, data are gathered from a variety of sources and by using several different methods (e.g. observations & interviews). The case study research method originated in clinical medicine (the case history, i.e.

means of disseminating new knowledge gained from clinical practice.

## ~~Case Study Method in Psychology | Simply Psychology~~

Case study. For instance, clinical science has produced both well-known case studies of individuals and also case studies of clinical practices. However, when "case" is used in an abstract sense, as in a claim, a proposition, or an argument, such a case can be the subject of many research methods, not just case study research.

## ~~Clinical Case Studies and Reports (CCSR)~~
