Concrete: We use it for our buildings, bridges, dams, and roads. We walk on it, drive on it, and many of us live and work within its walls. But very few of us know what it is. We take for granted this ubiquitous substance, which both literally and figuratively comprises much of modern civilization's constructed environment; yet the story of its creation and development features a cast of ...

A history of concrete, which is far more interesting than it sounds. Starting with concrete's prehistoric origins, the book covers its extensive use by the Romans, the development of different types of cements in the Industrial Revolution, and the invention of reinforced concrete. Stories include the making of the first tunnel under a river, the construction of the famous Sydney Opera House ...
