Standard loading codes (used for calibrating EC3) and to BS 8110 for the fire design. During the drafting process, further ENV standards have been published, in particular for loading (EC1) and for fire design (EC3, Pt 1.2). The designer can use this Manual with these ENV pre-standards in engineering with their own NADs.

design of a structure (e.g. Part 1.1 contains no material on connections, all of which is given in Part 1.8). Thus, in practice, designers will need to consult several parts of the code. It is for this reason that we have elected to base the content of the book on more than just Part 1.1. Readers will also find several references to the UK National Annex.

EN 1993: Design of steel structures. EN 1993 Eurocode 3 applies to the design of buildings and other civil engineering works in steel. It complies with the principles and requirements for the safety and serviceability of structures, the basis of their design and verification that are given in EN 1990 – Basis of structural design.

~~EN 1993-1-2: Eurocode 3: Design of steel structures – Part ...~~

BS EN 1993-1-8:2005 EN 1993-1-8:2005 (E) (3) Where two parts connected by welding are separated by packing having a thickness equal to, or greater than, the leg length of weld necessary to transmit the force, each of the parts should be connected to the packing by a weld capable of transmitting the design force.

~~EN 1993: Design of steel structures—Eurocodes~~

Effective length parameters are given in Figure 3.1/Table 3.1 for beams and in Figure 3.2 for cantilevers P363 - Blue Book to EC3 Only other input required is the C1 factor, which is summarised in Table 6.4 of the Concise Eurocodes

~~Design to EC3 Part 1-5~~

a For the purpose of EC3-1.1 these four categories of variable actions should be treated as separate and independent variable actions. b Local drifting of snow on roofs should be treated as an accidental action [see 6.1.1 c]. c The most onerous of the three specified alternatives should be treated as a single variable action. Variable action $\tilde{O} 1$ or \tilde{O}
