## *Designing the User Interface - Edition 6*

Shneiderman's "Eight Golden Rules of Interface Design" These rules were obtained from the text Designing the User Interface by Ben Shneiderman. Shneiderman proposed this collection of principles that are derived heuristically from experience and applicable in most interactive systems after being properly refined, extended, and interpreted [9] .

## *USER INTERFACE DESIGN*

Based upon Ben Shneiderman's "Designing the User Interface" and Jakob Nielsen's "Ten Usability Heuristics", 10 general principles for interaction design. They are called "heuristics" because they are broad rules of thumb and not specific usability guidelines.

## *Golden Rules of User Interface Design - UX Planet*

As much as possible, design the interface so that users cannot make serious errors; for example, gray out menu items that are not appropriate and do not allow alphabetic characters in numeric entry fields (Section 3.3.5). If users make an error, the interface should offer simple, constructive, and specific instructions for recovery.
