~~Digitizing Identities: Doing Identity in a Networked World ...~~

This book explores contemporary transformations of identities in a digitizing society across a range of domains of modern life. As digital technology and ICTs have come to pervade virtually all aspects of modern societies, the routine registration of personal data has increased exponentially, thus allowing a proliferation of new ways of establishing who we are.

~~Digital Identities & Customer Personalization | Tech ...~~

Digital identity systems should improve every citizen's interaction with the state. But they're not always designed with the needs of every citizen in mind. This episode includes stories about how enrolling can expose vulnerable users to risk, how disabled users can be excluded from digital identity systems, and four insights from our research team on privacy and vulnerability.

~~Protecting Your Identity: How To Keep Control Of Your ...~~

The traditional identity systems of today are fragmented, insecure, and exclusive. Blockchain enables more secure management and storage of digital identities by providing unified, interoperable, and tamper-proof infrastructure with key benefits to enterprises, users, and IoT management systems.

~~What is Digital Identity and how can you protect yours?~~

Decentralized identity is how individuals control when, where and with whom they share their credentials. In the physical world, we take this sharing of credentials for granted - yet a secure, smart way to do this has been long missing in the digital world.

~~Digitizing Identities: Doing Identity in a Networked World ...~~

A digital identity is a number, code, record, object or collection of attributes that are used by information technologies to identify entities such as people, organizations, users and customers.

Digital identity, which is also known as Identity 2.0, is everything that identifies us in the online world.. In the online world, in addition to retaining the same data that identifies us in the offline world, our identity is completed through everything we do: comments on articles, likes on Facebook, retweets, photos on Instagram, petitions we sign on Change.org, etc.
