Basic Dyes | Direct Dyes - Viana Chemicals, Gujarat, India

The classification of dyes according to their usage is summarized in Table 8.1, ... Direct Dyes Direct dyes are water-soluble anionic dyes, but are not ... dyes for application to synthetic hydrophobic fibers from aqueous dispersions.

Synthesis and Application of Direct Dyes Derived From ...

These dyes are widely used all over Asia and Australia for batik and direct application. They can be used to give interesting texture colour effects on fabric, thread or paper. Their use for straight silk painting is minimal because of the difficulty in achieving evenness of painted colour.

Dyeing Process - an overview | ScienceDirect Topics

Food dyes. One other class that describes the role of dyes, rather than

Download Free Direct Dyes And Their Application Infohouse

their mode of use, is the food dye. Because food dyes are classed as food additives, they are manufactured to a higher standard than some industrial dyes. Food dyes can be direct, mordant and vat dyes, and their use is strictly controlled by legislation. Many are azo dyes, although anthraquinone and triphenylmethane compounds ...

Direct Dyes And Their Application

Chapter 2: Direct Dyes and Their Application By J. R. ASPLAND, School of Textiles, Clemson University, Clemson, S. C. T 0 reiterate a definition from Chapter I (TCC, October, p14), direct dyes are "anionic dyes substantive to cellulose when applied from an aqueous bath con-

Direct dye - Application of Direct Dyes
Download Citation | Direct dyes - Their application and uses | Direct dyes are used on cellulosic fibers when good lightfastness is needed, but

Download Free Direct Dyes And Their Application Infohouse

washfastness is not critical. This includes window ...

Different Types of Dyes with Chemical Structure | Meghmani

Dyeing and printing processes are value-added treatments for most textile materials. A dyeing process is the interaction between a dye and a fibre, as well as the movement of dye into the internal part of the fibre. Generally, a dyeing process involves adsorption (transfer of dyes from the aqueous solution onto the fibre surface) and diffusion (dyes diffused into the fibre).

isophthalic acid using J and H- acids was

Dye - Wikipedia

Direct Dyes. Direct Dyes are made up of fine ingredients. These dyes are appreciated for their high density, solubility, stability and color fastness. They are non-toxic and hence easy to apply. They are cheap in comparison to reactive dyes. Direct Dyes that belong to hot water dyes are used on cellulose fibres like cotton.

Direct Dyes, Light Fast Dyes, Direct Dyes Manufacturer

Direct dyes: These dye staffs are generally sodium salt of sulphonic acid. They have direct affinity to cellulosic fiber. Types of dyes and their properties are water soluble and needs salt addition in the dye bath, should be applied at alkaline or neutral condition. This dye staff is poor fastness to wash but cheaper.

Direct dyes - Their application and uses

Download Free Direct Dyes And Their Application Infohouse

Direct Dye: Direct Dye is a class of dyestuffs that are applied directly to the substrate in a neutral or alkaline bath. They produce full shades on cotton and linen without mordanting and can also be applied to rayon, silk, and wool. Direct dyes give bright shades but exhibit poor washfastness. Various aftertreatments are used to improve the washfastness of direct dyes, and such dyes are ...

Dye | Classification of Dye According to Application ...

Acidic dyes, basic dyes, azoic dyes, nitro dyes, vat dyes, mordant dyes, and sulphur dyes, etc. are synthetic dyes.

**[Based on application] Direct Dye .

These dyes are applied to the fabric by preparing an aqueous solution and submerging the fabric in it. Fabrics which can form hydrogen bonds with the dye molecule are dyed with direct dyes.

Direct Dyes and Their Application - P2 InfoHouse

Download Free Direct Dyes And Their Application Infohouse

Their flat shape and their length enable them to lie along-side cellulose fibers and maximize the Van-der-Waals, dipole and hydrogen bonds. Application of Direct Dyes. They are usually applied with the addition of electrolyte at or near the boil in the machines capable of running at atmospheric pressure.

Various Classification of Dyes | Different Types of Dyes ...

Anionic Direct Dyes Anionic Direct Dyes are used for coloring papers, controlling tint and shade and correction of two sided paper color. The main structural features of the Anionic Direct Dyes are: the planar vary from each other, the structural single and double bonds are very much extended, and contains one or more than one sulfonate groups.

Classification of dyes - SlideShare

Dyeing is the application of dyes or pigments on textile materials such as fibers, yarns, and fabrics with the goal of achieving color with desired color

Download Free Direct Dyes And Their Application Infohouse

fastness. Dyeing is normally done in a special solution containing dyes and particular chemical material. Dye molecules are fixed to the fiber by absorption, diffusion, or bonding with temperature and time being key controlling factors.

Chapter 8-DYES-THE CHEMISTRY AND APPLICATIONS

Classification by methods of application

- Method used for application depends on the nature of both....Dye and Fabric.
 - They are classified on the basis of technique employed for their application.
17. Direct Dyes
- Carried out in a neutral or slightly alkaline dye solution.
 - It contains acidic or basic auxochromes.
 - Polar in nature.

Dyeing - Wikipedia

Direct dye, also called Substantive Dye, any of a class of coloured, water-soluble compounds that have an affinity for fibre and are taken up directly, such as the benzidine derivatives. Direct dyes are

Download Free Direct Dyes And Their Application Infohouse

usually cheap and easily applied, and they can yield bright colours.

Washfastness is poor but may be improved by aftertreatment.

*Introduction of Direct Dyes |
Classification of Direct Dye ...*

Ease of application; Types of Direct dye. Direct dyes are classified based on- Chemical structure; SDC classification based on dyes' levelling ability and their response to increase in the dyeing temperature and to added salt during exhaust dyeing.

Direct dye | Britannica

Natural dyes are vat dyes, substantive or mordant dyes. There are some advantages of natural dyes, such as: these dyes need no special care, wonderful & rich in tones, act as health cure, have no disposal problems, have no carcinogenic effect, easily biodegradable, require simple dye house to apply on matrix and mild reactions conditions are involved in their
