SS-EN-ISO-15614-13:2005—Specification-and-qualification—  
ISO 15614-13:2012 specifies tests for the qualification of welding procedure specifications applicable to upset (resistance butt) welding and flash welding of metallic materials, e.g. with solid, tubular, flat or circular cross-section.

Norma-UNE-EN-ISO-15614-13:2013  
The basic principles of this part of ISO 15614 may be applied to other resistance welding processes when this is specified in the specification. NOTE This part of ISO 15614 is a part of a series of standards. Details of this series are given in ISO 15607:2003, Annex A. This part of ISO 15614 defines the conditions for carrying out tests and the ...

UNI-EN-ISO-15614-13:2012  
This part of ISO 15614 covers the following resistance welding processes, as defined in ISO 4063: - 24 flash welding, using direct current or alternating current with various movement sequences, constant flashing and pulsed flashing; - 25 resistance upset welding, using direct current or alternating current with various pressure sequences.

DIN-EN-ISO-15614-13—2012-10—Beuth.de  
ISO 15614-1:2017 defines the conditions for the execution of welding procedure tests and the range of qualification for welding procedures for all practical welding operations within the qualification of this document.
