This project will explore how to model dialogue phenomena in visual dialogue and how these phenomena contribute to task success. Visual dialog involves an agent to hold a meaningful conversation with a user in the context of an image. These systems find potential application in VR technology, dialog based image retrieval and agents which can provide viable information to

Diana Janz - The University of Edinburgh - Edinburgh, City ...

Linguistics is the scientific study of language. It involves the analysis of language form, language meaning, and language in context. Linguists traditionally analyse human language by observing an interplay between sound and meaning. Linguistics also deals with the social, cultural, historical, and political factors that influence language, through which linguistic and language-based context ...

Essential Programming for Linguistics (Edinburgh Advanced ...

This book introduces programming for linguists. Linguistic programming is becoming an important topic for advanced students of linguistics, especially those that are trying to process corpus materials or literary texts for B.A. dissertations, Ph.D. theses, or advanced research. This volume assumes no background knowledge of programming.

Modern Languages and Linguistics | University of Oxford
