Pegler, D. N. 1983. The genus Lentinus: a world monograph. Kew Bulletin Additional Series 10: 1-281. Rune, F. 1994. Neolentinus - a well-founded genus in Pleurotaceae that includes Heliocybe. Mycological Research 98: 542-544. Thiers B. [continuously updated]. Index Herbariorum: A global directory of public herbaria and associated staff.

The Genus Lentinellus (MushroomExpert.Com)

Lentinellus is a genus of white rot, wood decay, lamellate agaric in the family Auriscalpiaceae, further characterized in part by rough-walled, amyloid spores produced on lamellae with jagged edges. Typically, thick-walled hyphae in the fruit body are in part amyloid, and frequently the taste of the mushrooms is acrid (burning, spicy).
