whatever existing geologic and geotechnical information is available at this stage especially for bridge c cu d60 d10 d cc 09 013 d302 d60 d10

Geotechnical Engineering: Foundation Design: Cernica, John ...

Strength evaluation is done on sandy, clay and silty medium to determine the vast array of data for engineering design measures. A parametric study is then done by varying the foundation depth from 0.7m to 2.0m, soil angle of internal friction from 10° to 40° and the inclusivity of gap upon failure.
