TikZ/PGF - Graphic systems for TeX

Latex can not manage images by itself, so we need to use the graphicx package. To use it, we include the following line in the preamble: `\usepackage{graphicx}` The command `\graphicspath{ {./images/} }` tells L a T e X that the images are kept in a folder named images under the directory of the main document.. The `\includegraphics{universe}` command is the one that actually included the image in ...

Graphics With Tikz Tex

This five-part series of articles uses a combination of video and textual descriptions to teach the basics of creating LaTeX graphics using TikZ. These tutorials were first published on the original ShareLateX blog site during August 2013; consequently, today's editor interface (Overleaf) has changed considerably due to the development of ShareLaTeX and the subsequent merger of ShareLaTeX and ...

TikZ examples tag: Graphs

The probably easiest way in TikZ is: draw a “double” line (TikZ manual, 15.3.4 Graphic Parameters: Double Lines and Bordered Lines). Originally, it gives two parallel lines with space in-between filled by a color. But we want to get a single line. Solution: a double line in white, the gap between them filled in
