Gunite Manual Slack Adjuster

for the Gunite automatic slack adjuster is similar to that which is required for manual slack adjusters. Gunite automatic slack adjusters do not require any external brackets, adapters, or special mounting holes for installation. Popular spline and arm length combinations allow them to be used to replace most other slack adjusters.

Slack Adjusters | Meritor_NA

A manual slack adjuster (also called a brake adjuster) is a mechanical component in the air brake linkage. This component is used to remove the slack created by wear on the friction element of the brake shoes that normally occurs during operation of the vehicle. This is done manually with the aid of a wrench while the vehicle is being serviced.

CHOOSING THE CORRECT MERITOR AUTOMATIC SLACK ADJUSTER

The Gunite slack adjusters are factory-lubricated and extensively sealed to protect against dirt, water, salt and other corrosive elements. However, it is recommended periodic lubrication take place every 6 months or 50,000 miles ensuring the Tru-Seal® link boot, O-rings
