HP and Compaq Desktop PCs - BIOS Beep Codes | HP® Customer ...
Beep Codes for HP Workstations* Note: This diagnostic definition is used by the field service to debug troubled system when error happened before BIOS can turn on display to throw in error messages. (Happen very early i.e. Processor not installed correctly etc.) Symptom Diagnosis and Action Blinks RED 2 times, once per second, then 2 second pause.

2 long followed by 2 short beeps - HP Support Community ...
The 5 beeps is a memory or motherboard problem. I would remove all but one of the memory modules and test each one individually and find the one (s) that may be bad. If the PC beeps 5 times with all of the single memory modules tested at a time, then you can pretty much bet the motherboard is shot and not all of the memory chips.
