7.3 Quotients

We can treat a quotient $q = x/y$ much like a product; $x \pm \Delta x$ and $1/y \pm \Delta(1/y)$. The uncertainty can be as big as $x \pm \Delta x$ and $1/y \pm \Delta(1/y)$ (17) or as small as $x \pm \Delta x$ and $1/y \pm \Delta(1/y)$ (18) The same type of analysis can be carried out as in the Products section, leaving us with the same equation:
