[Leica ULT500 Ultra Observer User Manual](#)

The Leica OHS was for many years considered the standard for intra-cranial and spine microsurgical procedures. Recently, it has evolved into a premier option for outpatient spine as it has much more reach and maneuverability compared to the latest Leica models marketed for spine today, including the M52, M53, and the F40 models.

The TD 100, with the advanced vapor management system, can be installed near the TEE procedure room. This will allow for minimal transportation of the delicate probes for reprocessing. When compared to manual reprocessing, the TD 100 allows more procedures with the same probe, while reducing stress and potential damage to probes.
