The COVID-19 pandemic brings a high level of stress and anxiety as it rapidly changes the way we work, socialize and live. Caring for your mental health is important in these times. People naturally have many different feelings and responses, both positive and negative, when they have to cope, including: panic, anxiety, worry, fear

Text messaging: The next gen of therapy in mental health ...
Managing mental health during COVID-19. Updated June 5, 2020. During a crisis such as the COVID-19 pandemic, it is common for everyone to experience increased levels of distress and anxiety, particularly as a result of social isolation. Physicians and other frontline health care professionals are particularly vulnerable to negative mental health effects as they strive to balance the duty of caring for patients with concerns about their own well-being and that of their family and friends.

Care for Your Mental Health
Mental health includes our emotional, psychological, and social well-being. It affects how we think, feel, and act. It also helps determine how we handle stress, relate to others, and make healthy choices. 1 Mental health is important at every stage of life, from childhood and adolescence through adulthood.

Mental Health Care For People
People affected by mental health conditions face unique challenges during the COVID-19 crisis. Fortunately, the Senate and the House has passed the Coronavirus Aid, Relief and Economic Security (CARES) Act, which will give immediate help to individuals and nonprofits struggling because of this emergency.
