Optimax Air Injectors and Fuel Injectors

A partially full tank is not recommended because the void space above the fuel allows air movement that can bring in water through condensation as the air temperature moves up and down. This condensation could potentially become a problem. Mercury Marine Quickstor can help maintain fuel systems in storage.

Mercury Optimax 150-HP Major Problems - Moderated ...

Turns out the issue was the diaphragms in the fuel system had deteriorated, my issue got way worse when one got a hole in it. The issue was causing fuel to enter where only air should be so when the fuel was mixed it was getting the normal amount of fuel plus whatever was in the air system.

MERCURY - Optimax Pro XS

A failed Mercury Optimax air compressor will send debris to the air injectors. This debris can limit the operation of these injectors and cause all kind of

The OptiMax Two-Stage Direct Injection System produces consistent performance and unmatched throttle response by providing a constant supply of atomized fuel and air. The Pro XS also offers a Higher Wide-Open-Throttle RPM Operating Range, giving you more propeller options to maximize the performance of your boat.

Mercury Optimax 150 Manuals

The OPTIMAX is the most MIS-DIAGNOSED engine out there. Symptoms caused by leaking REGULATOR DIAPHRAMS point to: Bad Injectors Bad Fuel Pumps Leaking VST Air in Fuel Lines Bad Gas Bad TPS Rubber Regulator Diaphragms dry and crack because of today's fuel content. Also, low engine use tends to dry out the Diaphragms.

Fuel & Fuel Systems | Mercury Marine
Mercury Marine, based in Wisconsin, has been making Mercury outboard motors in two- and four-stroke versions ranging from 2.5 to 350 horsepower for more than 75 years, though the company's first motors did not have as much horsepower as some of its current motors. If you have a two-stroke outboard motor, you must add oil to the fuel to lubricate the engine.

MERCURY OPTIMAX FUEL RAIL REPAIR
When the engine is in the run state, the PCM calculates the fuel consumed to determine when to turn the lift pump on. On a Verado based engine, the PCM will not cycle the lift pump until it has counted 150 grams of fuel used. On a 75-115, the PCM will not cycle the lift pump until it has counted 60 grams of fuel used.
