Nuclear Endocrinology - The Journal of Nuclear Medicine

Nuclear Endocrinology | Doina Piciu | Springer

Endocrine hypertension forms a small (< 5%) but curable subset of patients with hypertension. Common endocrine causes of hypertension include pheochromocytoma, Cushing's syndrome, primary hyperaldosteronism, and thyroid disorders. Nuclear medicine imaging plays an important role in evaluation of patients with endocrine hypertension.

Tri-County Endocrinology and Nuclear Medecine - Sterling ...

An Endocrinologist is a physician specially trained in diseases of the hormone system under a Endocrinology, Metabolism and Diabetes fellowship. The endocrine system is a complex system that affects every aspect of the human body.

Nuclear Medicine and Endocrinology - Czech Hospital Placements

Nuclear Medicine Endocrinology. Inflammation of the gland that affects the ability to trap iodine due to virus, bacteria, pregnancy or autoimmune condition. Starts as hyper (1-2months) but the damaged tissue will leak causing hypothyroidism.

Nancy A. Lee, MD, FACE. After that she moved to San Antonio, where she completed a fellowship in Endocrinology at the University of Texas Health Sciences Center at San Antonio. Lee is interested in thyroid, parathyroid, pituitary and adrenal disorders as well as osteoporosis and diabetes. Lee enjoys painting, photography and swimming.

Nuclear Medicine Endocrinology Flashcards | Quizlet

Nuclear medicine techniques were first applied in endocrine disorders, mainly involving the thyroid gland. Radioiodine administration is still the standard of practice for the ablation of thyroid remnants after surgery for thyroid cancer, and for patient follow-up and re-staging.

Nuclear Endocrinology | Doina Piciu | Springer

Her endocrinology fellowship/nuclear medicine training was completed at Detroit Osteopathic Hospital Corporation. She is board certified in endocrinology, nuclear medicine and internal

medicine and is a fellow of the American Association of Clinical Endocrinologists and American College of Osteopathic Internists.

New Challenges in Nuclear Endocrinology

Nuclear medicine is an important element of daily practice for the endocrinologist, both for diagnosis and for treatment. The continuous rapid development of nuclear medicine procedures has created the need for a concise, up-to-date practical guide that presents the essential information required by the endocrinologist.

Nuclear Endocrinology - The Journal of Nuclear Medicine

Our center comprises two departments - Nuclear Medicine and Endocrinology. Administering a small amount of radioactive substance into the body in order to diagnose, determine and treat a disease - typically cancer is the purpose of Nuclear Medicine. These radiopharmaceuticals target a specific organ or the cellular receptors.
