Oil Spill Preparedness, Response and Intervention Services
Oil spills often have disastrous impacts on the environmental ecosystems, human health and economy. Accurate and quick predictions of oil spill movements will save costs and greatly speed up the process of emergency operations. At the same time, having a response plan in place to meet regulatory requirements are also key concerns for stakeholders.

The Global Initiative | IPIECA

The emergency spill response market is driven by the increasing international trade and transportation and initiatives taken by government agencies of various countries globally to protect the environment from the adverse effects of pollution by enacting various environmental protection and restoration policies and legislations.

Oil Spill Response Company History | Spanning 30 Years
