change from an agricultural to an urban landscape. The paper explores the reasons for this difference and recommends the conservation of green open spaces through the adoption of an ecological planning approach involving a mixture of urban and agricultural land uses. KEYWORDS aerial photographs / agricultural lands / changing patterns / Metro

### **Land | Special Issue : Understanding the Patterns, Drivers ...**

In 1982, agricultural land use dominated in both of the two study areas, but the area under cultivation had decreased by 1997. The changing pattern in the northwest study area was one of phased transition towards a more urban land use. In contrast, in the southeast study area, there was a sudden change from an agricultural to an urban landscape.

### **(PDF) Spatial pattern of agricultural land conversion in ...**

Agricultural land use means land under net sown area, fallow land and cultivable land excluding permanent fallow land. The cultivable area is known as agricultural land. Cropping pattern mean the proportion of area under different crops at a point of time or year, it is a dynamic concept because it changes over space and time. The study of

### **Land use change mapping and analysis using Remote Sensing ...**

Agriculture contributes to climate change both by anthropogenic emissions of greenhouse gases and by the conversion of non-agricultural land such as forests into agricultural land. [5] [6] In 2010, agriculture, forestry and land-use change were estimated to contribute 20–25% of global annual emissions. [7]

The purpose of this study is to identify the spatial pattern of changes in agricultural land in West Java Province as input to improve food security condition in this province.

### **Special Issue "Agricultural Land Abandonment: Patterns ...**

Wastelands are degraded land—under-utilised and suffering from lack of proper soil and water management—brought under vegetative cover with reasonable effort. Table 22.2 shows the categories of wastelands in India. As the economy grows, land use patterns also change. As a result, land is being put to use in areas other than agricultural.

### **Climate change and agriculture - Wikipedia**

Like many other countries, South Africa's arable land is under threat from land degradation, water scarcity and urban encroachment. "We are also losing prime agricultural land through land-use changes. Given our history, broadening access to agricultural land for commercial production and subsistence farming is a national priority."

### **Land Use Change - an overview | ScienceDirect Topics**

This increasing trend of land cover/land use change in the watershed's area reinforces that economic forces are commonly a major stimulus on anthropogenic change of land (Wang et al., 2008) and it is the main reason why the area near and around the main water-bodies and streams in the watershed has shifted from other land covers to Agriculture cover.
