8M - Motion, Forces,  
and Energy ...

When you know both the speed and the direction of an object's motion, you know the velocity of the object. You can show the motion of an object on a line graph in which you plot distance versus time. In science, acceleration refers to increasing speed, decreasing speed, or changing direction.

Energy Answer

Real World: Work,  
Force, Energy and  
Motion

The force of attraction that exists between all objects in the universe is called falling friction also known as \_\_\_\_\_.
