A Buying Guide: What are the Differences Between Pentax ...

The Pentax 6x7, and later the Pentax 67, are streamlined medium format camera systems consisting of the camera body, an interchangeable prism viewfinder and one or more lenses. A standard Pentax 6x7 outfit typically includes a non-metered pentaprism and a Super Takumar 105mm f/2.4 lens.

---

Pentax 6X7 Lens Tests - Antique and Classic Cameras

Nearly every single lens made for the Pentax 67 is a stunner both physically and practically, churning out some of the most nuanced and beautiful images in medium format photography. When paired with a good film, good eyes, and impossibly buff arms, it's hard to beat the Pentax 67 in the professional medium format sphere.

---

Pentax 67 Review

SMC Pentax 67 105mm f/2.4 Lens It is rumored that each version featured an updated coating that provided better micro-contrast and sun-flare control. This means in theory that each successive version will have a subtle increase (if noticeable) "3d" effect compared the one prior, and better contrast and light control.

---

Pentax 6x7 - Wikipedia

There are two mounts built into this camera to handle various sizes of the 67 lenses. Smaller ones use the inner bayonet, larger the outer one. Like the body, lenses are beefy. Shooting with the Pentax 67 is really nice. Bulk aside, it is a great performing and really smooth camera. The action in the shutter, lens focus, crank and so on are beautiful.

Pentax 67 quick start guide

The late 80's was the last major update with minor cosmetic changes ( all lenses now have rubberized focus and aperture rings ) and a name change to "SMC Pentax 67." In the late 90's and 2001, Pentax added a few more lenses to the line including the 75 2.8AL, 55-100, 90-180, and 300ED.

A Guide to the Best Pentax Camera Lenses - Reviewed Lenses

Pentax 67 or 67ii? When deciding what 6×7 camera I should get for portraits, I like many people had narrowed it down to either the newer Pentax 67's or Mamiya RZ/RB 67 system. Ultimately the look of the Takumar lenses and the "portability" beat out the convenience of Mamiya's modular system and the fact that I don't shoot with strobes.
