Speed control | Perkins - Perkins Engines

Sensors and senders are used across the diesel engine to monitor and control operation, to enable the modern Perkins diesel engine to operate efficiently, and maintain emissions standards. Sensors measure air and fuel flow to temperature, pressure and exhaust content, providing feedback so the engine can be adjusted for optimum performance.

Perkins Engine Speed Sensor

Speed and position sensor U5MK1234 used to monitor the rotational of the crankshaft and using this the position of the pistons. This information is used along with other sensor inputs by the ECU or engine management system to control ignition timing and fuel injection. This ignition and fuel control is key to ensure correct emissions are ...

Buy genuine Perkins sensors | Perkins - Perkins Engines

Looking for original crankshaft speed sensors for your Perkins engine. Buy genuine and direct from Perkins for hassle free, fast and effective service.

[Buy genuine Perkins crankshaft speed sensors | Perkins](#)

Minimum lever position, lowest speed; maximum lever position, highest engine speed. When you apply load to an off-highway diesel engine running at the speed set by its operator, the engine automatically develops power to maintain its speed. In a mechanical engine, a mechanical speed governor performs this function. Balance of forces
