The current study examines the effect of global climate change (CO₂ emissions), financial development, and technical progress (fertilizer consumption and improved seed distribution) on cereal production in Pakistan over the 1977–2014 period. The study undertakes the autoregressive distributed lag (ARDL) bounds testing approach to investigate the long-term interrelation among the variables.

(PDF) 1 - Introduction to cereal processing and by-products

The germ of a cereal is the reproductive part that germinates to grow into a plant; it is the embryo of the seed. Along with bran, germ is often a by-product of the milling that produces refined grain products. Cereal grains and their components, such as wheat germ oil, rice bran oil, and maize, may be used as a source from which vegetable oil is extracted, or used directly as a food ingredient.

Cereal germ - Wikipedia

About one-third of global cereal production is fed to animals . But currently, one of the major challenges to the food system is the rapidly increasing demand for meat and dairy products that has led, over the past 50 years, to a ~1.5-fold increase in the global numbers of cattle, sheep, and goats, with equivalent increases of ~2.5- and ~4.5 ...

The Seven Principles of Kwanzaa. The foundation of Kwanzaa are the Seven Principles, or Nguzo Saba. When Dr. Karenga created the celebration of Kwanzaa he wanted to reflect the best qualities and characteristics of the “first fruit” or harvest festivals that were celebrated throughout Africa. It was these qualities that established the Nguzo Saba, or Seven Principles of Kwanzaa.

The grocery store is a good source of ratios in real life. While looking at the prices of various groceries, you can easily illustrate ratios using two different boxes of cereal. For example, if a 10-ounce box of cereal costs \$3 and a 20-ounce box of cereal costs \$5, the 20 ounce box is the better value because each ounce of cereal is cheaper.

How to Use Ratios & Proportions in Real Life | Sciencing

Cereal crops are interchangeably called grain crops. In many publications and correspondence, they are simply called grains or cereals. As of 2012, the top 5 cereals in the world ranked on the basis of production tonnage are maize (corn), rice (paddy), wheat, barley and sorghum.

List of Cereal Crops and General Info About Cereals

Ayurveda - Wikipedia

Plant breeding, application of genetic principles to produce plants that are more useful to humans. This is accomplished by selecting plants found to be economically or aesthetically desirable, first by controlling the mating of selected individuals, and then by selecting certain individuals among the progeny. Such processes, repeated over many generations, can change the hereditary makeup and ...

Persuasion, the process by which a person's attitudes or behaviour are, without duress, influenced by communications from other people. One's attitudes and behaviour are also affected by other factors (for example, verbal threats, physical coercion, one's physiological states). Not all communication is intended to be persuasive; other purposes include informing or entertaining.
