Puerto Rico Mountains | Cordillera Central Range

Puerto Rico's central region is uncharted territory for most tourists. The Cordillera Central, the island's largest mountain range, bisects the land, and the region's 20 cities are a mix of small towns. There's no beach, the rugged mountains can be unforgiving to those in search of a leisurely hike, and, let's face it, this part of the island doesn't get the publicity that other destinations receive.

Sights in The North Coast and the Cordillera Central ...

Cordillera Central, limestone mountain range that forms the interior of Puerto Rico island. It consists of three parts. The Cordillera Central proper occupies the west-central part of the island, extending about 50 miles (80 km) from San Germán in the west to the watershed between the Manatí and La Plata rivers in the east-central part of the island.
