## **Painted Brick | HGTV**

Small house plans can be defined as home designs with under 2,200 square feet of living area. They can be either one-story style floor plans, or multi-story house designs just as long as the square footage is under 2,000 square feet. These homes have grown in popularity as building materials and land prices increase.

## **Houses Of The to Brick a House (with Price Factors)**

A solid brick house has many other

advantages which go with the use of a high grade material. Solid brick lasts at least three times as long as an ordinary house, insurance rates are lower, it never requires painting, and the yearly coal bill is much less. Solid brick is the best possible insulation against heat, cold, and

dampness.

Brick siding is one of the oldest building materials still in use. The primary reason brick has been so popular is the ease of maintenance. Under normal conditions, brick siding will last the life of the house with nothing more than the occasional wash down.
