A thorough inspection process of drilling tubulars is required to be sure they meet the criteria for the job and is vital for maintaining the flow of operation. Inspection can help foresee any future problems before damage to the tubulars becomes critical, thus preventing costly repair bills, environmental damage and most importantly, injury to ...

## **My-Spread Forum | BHA Inspection Criteria**

The DS-1 standard is the industry's premier inspection standard, showing the inspector how to find problems and the buyer how to get good results. This app doesn't give you the entire standard, but it allows you to quickly and easily find the requirements from the "Inspection Tables" tab for your components. That includes acceptance criteria for tubes, bodies, API connections, and all the ...

## **T H Hill Standard DS-1 Fourth Edition / 2012 / 4 volumes set**

These are the American Petroleum Institute's RP7G-2, TH Hill Associates' DS-1® and Fearnley Procter's NS-2™. Because of the increase in the number of 'complex' wells being drilled NS-2™ - which is designed specifically for use in this type of well - is being increasingly used.
