I don't deny that miracles have occurred, just that the available evidence fails to justify a belief that they have occurred. Be that as it may, if Jesus's resurrection is the 'disease' and the witness report is the 'test', we can now do the algebra to decide whether to believe in the resurrection.

Not all such pairs of factors are interesting, because... At a time when authors of arithmetic textbook wanted to reward their students with interesting results to elementary problems, they would often build some of their exercises on nontrivial factorizations of  $10^n - 1$  (Cunningham numbers). The most valued prizes were products of two factors with the same number of digits:
