The term seventh sense expresses the idea that telepathy, the sense of being stared at, and premonitions seem to be in a different category both from the five normal senses and also from so-called sixth senses based on known physical principles. EVIDENCE The first and most fundamental kind of evidence for the seventh sense is personal experience.

Extraordinary Abilities | The Sense of Being Stared At

The Sense of Being Stared At (2003) Sheldrake's The Sense of Being Stared At explores telepathy, precognition, and the " psychic staring effect ." It reported on an experiment Sheldrake conducted where blindfolded subjects guessed whether persons were staring at them or at another target.

Rupert Sheldrake - Wikipedia

The pervasiveness of the feeling of being stared at suggests an important adaptive benefit for maintaining it (despite its illusory nature)—one potential benefit is that the mutual experience of surveillance likely enforces ethical behavior. If we all believe we are being watched...

The Sense of Being Stared At: And Other Unexplained Powers ...

The psychic staring effect (sometimes called scopaesthesia) is a supposed phenomenon in which humans detect being stared at by extrasensory means.

Rupert Sheldrake - The Extended Mind - The Sense Of Being Stared At: Pt 1/3

The term seventh sense expresses the idea that telepathy, the sense of being stared at, and premonitions seem to be in a different category both from the five normal senses and also from so-called sixth senses based on known physical principles. EVIDENCE The first and most fundamental kind of evidence for the seventh sense is personal experience.

The Feeling of Being Stared At - Scientific American Blog ...

Out of the corner of your eye, even outside your field of vision, you can just tell someone is checking you out, sizing you up, or trying to make eye contact with you. Sometimes it almost feels like ESP, this ability to detect another person stare, because it often comes at the fringes of our awareness.
